

## IDENTITY THEFT TWO

**Directions:** The other team will be copying theft-prevention information from their worksheet. Your team will be a group of spies working to get that information. It is your job to obtain that information from them without their knowledge.

See how many of the nine points you can discover by:

- Asking questions.
- Looking at someone's paper.
- Taking a picture of their page.
- Listening to their conversations.
- Using other espionage techniques.

Be quiet! You do not want members of the other team to know you are after their answers.

In 5 minutes, the teacher will ask the class members to go back to their seats. Use your spy skills to get as many of the nine points from the other team as you can.

In the meantime, quietly discuss strategy with the other members of your group and act like you also are taking notes. You may work individually or team up with someone.
